Project Advisory:

MADAM AMILIA BT SAIDIN

Acknowledgment

We would like to express our sincere gratitude to all individuals who contributed to the successful completion of this Business Advisory Report.

First and foremost, we would like to thank Madam Amilia Binti Saidin, our project advisor, for her valuable guidance, continuous support, and constructive feedback throughout the preparation of this project. Her knowledge and advice greatly helped us in understanding the subject matter and improving the quality of our work.

We also extend our appreciation to Kedai Ramah for giving us the opportunity to conduct this business advisory project and for providing the necessary information and cooperation. Their willingness to share insights about their business operations was essential to the completion of this report.

In addition, we would like to thank our classmates for their support, shared knowledge, and helpful discussions throughout the course of this project. Special appreciation is also extended to all group members for their strong teamwork, commitment, and cooperation, which played an important role in completing this report successfully.

Thank you.

INTRODUCTION TO SULAM

SULAM (SERVICE-LEARNING MALAYSIA-UNIVERSITY FOR SOCIETY)

The SULAM (Service-Learning Malaysia-University for Society) program, in partnership with Kedai Ramah located in Bali, Indonesia, is designed to integrate university education with societal requirements. It provides students with vital abilities such as analytical thinking, collaboration, and interpersonal communication, enabling them to address challenges like those faced by Kedai Ramah. Through this practical curriculum, learners cultivate entrepreneurial and flexible perspectives, equipping them for the fast-paced world of modern marketing.

This collaboration serves as a prime example of service-oriented learning, offering students deep exposure to the inner workings of a small-to-medium enterprise (SME). Moving away from purely academic projects, participants interact with real-world partners, perform field research and data analysis, and create results with practical commercial worth. This approach significantly increases the practical application and importance of their university coursework.

From the viewpoint of Kedai Ramah, the program offers innovative and analytical insights. The varied academic foundations and creative concepts regarding branding, marketing, and the consumer journey provide a highly beneficial outside perspective. Furthermore, these contributions can increase the firm's existing knowledge base and provide a distinct gap within the competitive Bali food sector.

Essentially, this partnership between industry and the community promotes shared development, allowing students to acquire practical commercial experience while Kedai Ramah gains expert strategic advice. It represents a powerful union of university learning and business practice, demonstrating how tertiary education can effectively contribute to solving broader social and economic issues.

INTRODUCTION TO SULAM

PURPOSES AND OBJECTIVE

The primary purpose of this project is to produce versatile, creative, and holistic graduates, matching the objectives of Shift 1 in the Malaysia Education Blueprint 2015–2025 (Higher Education), which prioritizes the growth of well-rounded individuals. This program additionally strives to nurture a principled and value-based educational experience by championing fundamental principles like empathy, joy, and shared respect in the classroom. Moreover, the project works to embed a deep commitment to community involvement and social duty within students. It highlights the importance of mastering 21st-century skills such as leadership, productive teamwork, and patience to ensure students are ready to make significant contributions to the public good.

HOW SULAM CONNECTS LEARNING TO THE REAL WORLD

In terms of experiential learning, students develop professional and social skills through various projects, such as SME research surveys, public awareness campaigns, product design, and direct community training. Additionally, the program emphasizes critical reflection, which allows learners to better absorb academic lessons, evaluate their own growth, and plan their future career paths through structured reflection exercises.

Executive Summary

Incompleting oneofthe requirements for the assessment ofMAF671 Integrated Case Study,wehave choose Kedai Ramah. Our team was separated into five various groups tomake our analysismore systematic and detailed as it was easier to analyse each department in Kedai Ramah. The five departments that will be involved include the Finance, Production, Operations, Sales and Marketing and Human Resources. All these departments are valuable and make a business contribution to the day to day operations of Kedai Ramah as a Food and Beverages business in Bali, Indonesia.

The groups were appointed to one of the departments, and team members reviewed the activity of the department and determined its strengths and weaknesses using SWOT analysis. On top of that, the issues of the department that had been experienced by Kedai Ramah were also discussed by the team members and the appropriate recommendations made to assist in enhancing the overall performance of the company. In the process, we were in a position to understand more about the contribution of each department to the business. Consequently, this business advisory report will more elaborate and analyze the activities being undertaken by Kedai Ramah and combine the knowledge acquired under this course with real-life business issues that the company encounters.

TIMELINE OF SULAM

30/10/2025
- Identify which company thatwanttobeinterview
- Listed the company that haspossibilitytointerview
- Changes to make an internationalcompanyfor interview

06/11/2025
- All members decide and choose the department role and job scope

30/11/2025
- Submission first draft for revised Q&A session
- Decided date for interview and Q&A with Kedai Ramah session on 19th December 2026, 8am

19/12/2025
- Interview and Q&A session with Pak Kadek, owner of Kedai Ramah
- Summarise all information that needed
- Presentation report from each department on 16th January 2026

10/01/2026
- Getanother information from Kedai Ramah
- Prepare the report for SULAM report
- Preparation from each department for the presentation with international lecturer regarding the task given

11/01/2026
- Submission the first draft presentation from each department

15/01/2026
- Get thecomment from the lecturer towards each department
- Submission a revised slide Presentation

16/01/2026
- SulamPresentation from each department with collaborative lecturer from Bali Indonesia

19/01/2026
- Complete the Sulam Report

01/11/2025
- Small disscussion via GoogleMeet withall member
- Leader make give explanation and clarify what each department need to do
- Segregate the duties for each department

10/11/2025
- All question for the interview session had been posted in group
- each group will revised the question that suitable with the company

17/12/2025
- Last preparation with all group fromeach department
- Each department explain their role during the session

Company background

KEDAI RAMAH

KedaiRamahisa culinary Micro, Small, and Medium Enterprise (MSME/UMKM) operating within the Food and Beverage sector in Bali, Indonesia. Established in July 2024, the business is strategically located in a residential area of East Denpasar. The business was founded by Pak Kadek alongside two business partners, utilizing a renovated music studio within the owner's private residence as the primary business premise. The business was inspired by a successful local 24-hour Nasi Campur stall and allows the business to operate with minimal overhead costs by eliminating commercial rental expenses.

Operational Schedule:

- Tuesday – Friday: 4:00 PM – 10:00 PM
- Saturday – Sunday: 12:00 PM – 8:00 PM
- Monday: Closed

STRUCTURE AND MANAGEMENT

Thebusiness is managed centrally bythe three founding partners ("3 orang kepala"), supported by a workforce of **11 employees** who handle kitchen production and service. The management roles are distributed functionally among the 3 partners:

- Finance Department: Managed by one partner, responsible for nightly cash closing, recording transactions into the master spreadsheet, and calculating profit distribution.
- Marketing Department: Managed by Pak Kadek partner, focusing on social media engagement (Instagram/TikTok), responding to Google Reviews, and managing promotions.
- IT & Operations: Managed by the third partner, responsible for developing internal Excel databases for costing and overseeing daily production workflows.

PRODUCTS

Thecore business activity of Kedai Ramah is the production and sale of "Bakmie" (Noodles), featuring a signature flavor profile enriched with chili oil and shrimp. Kedai Ramah employs a distinct psychological pricing and naming strategy designed to cater to various income levels while maximizing customer acquisition. The product lineup is tiered as follows:

- **Mie Ramah**: The entry-level, most affordable option. This serves as a "bait" product (pemancing) to attract foot traffic and introduce customers to the brand.
- **Mie Rumah**: A mid-tier option that offers increased value with the inclusion of one topping and Pentol Bakso (meatballs).
- **Mie Ramai**: The premium offering, translating to "Crowded" or "Festive." This bowl features double toppings and additional sides, offering a higher margin for the business.

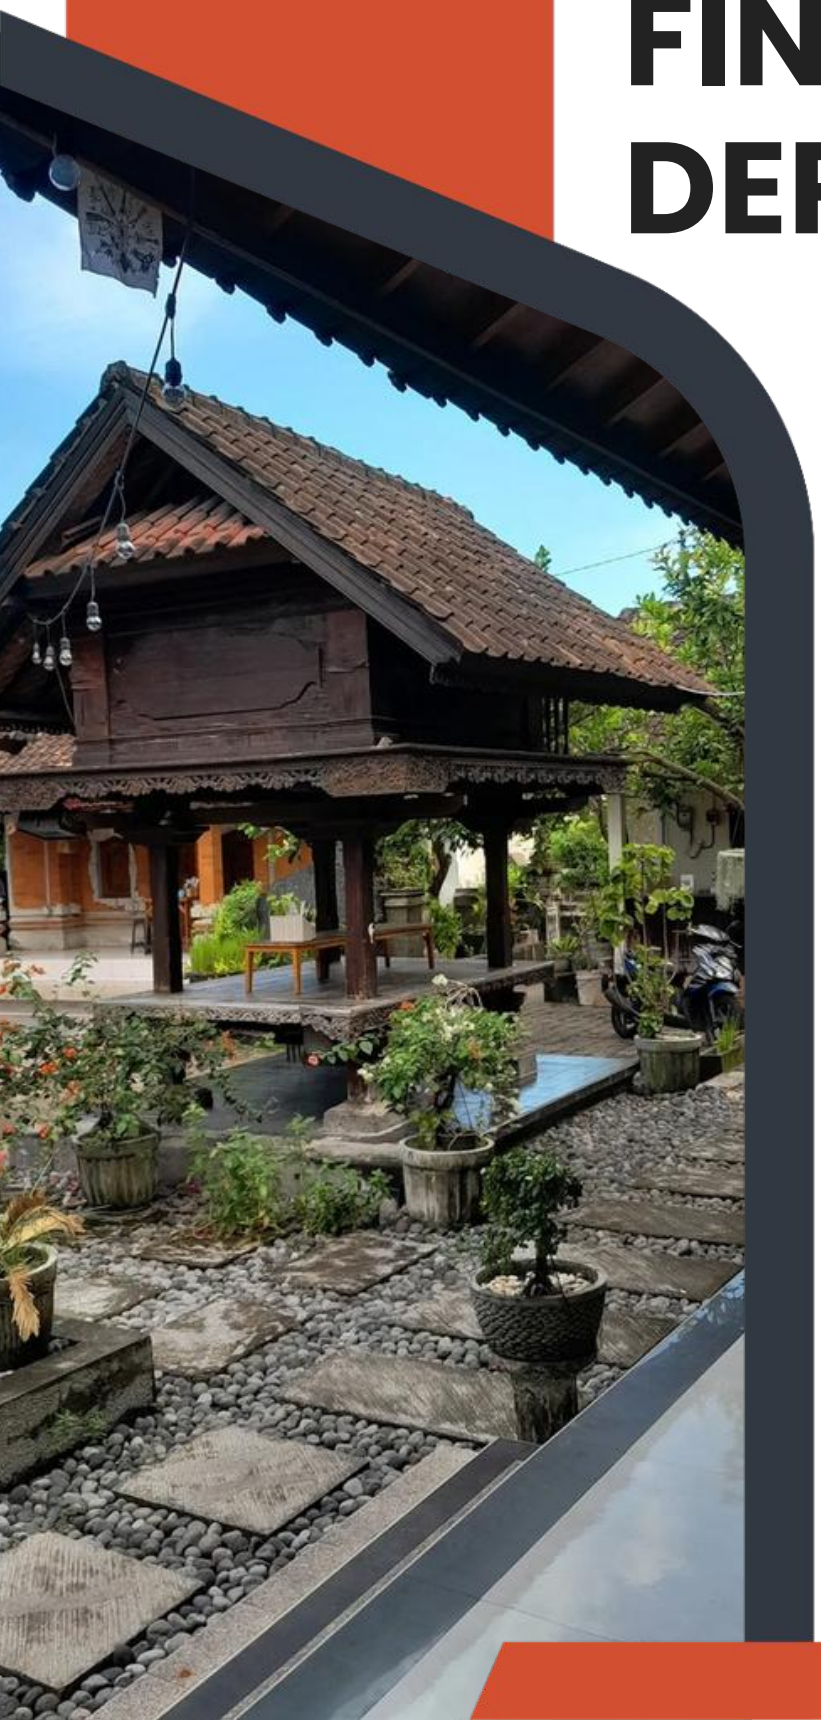

FINANCE DEPARTMENT

- DEPARTMENT INTRODUCTION
- ROLES & RESPONSIBILITIES
- CRITICAL SUCCESS FACTORS
- SWOT ANALYSIS
- ISSUES
- RECOMMENDATIONS
- CONCLUSION

DEPARTMENT INTRODUCTION

In general, the FinanceDepartmentplays avitalrole inensuringthe financialstabilityand sustainability of an organisation. It is responsible for managingfinancial resources,recording transactions,controlling costs, and providing financial information to support managerial decision-making. An effective finance function enables a business to understand its financial performance, maintain healthy cash flow, and plan for future growth. Regardless of business size, sound financial management is essential to ensure that operations remain efficient, transparent, and profitable.

KEY FUNCTIONS

In best practice, the Finance Department performs several key functions that support effective financial management:

Bookkeeping and Recording

Systematically records all financial transactions, ensuring accurate and complete financial data.

Documentation

Maintains proper supporting documents such as invoices and receipts to create a clear audit trail and reduce errors or fraud.

Financial Reporting

Converts financial data into key financial statements, allowing management to assess performance and financial position.

Pricing Strategy Support

Uses cost information to support appropriate pricing decisions that cover costs and generate profit.

RESPONSIBILITY

The primary responsibility of the Finance Department is to systematically manage financial data and track all cash flows within the business. This includes ensuring that all financial transactions are properly recorded, monitored, and controlled. The department is also responsible for safeguarding financial resources, maintaining financial discipline, and ensuring that funds are used efficiently to support business operations. Through these responsibilities, the Finance Department helps prevent financial mismanagement, errors, and misuse of resources.

ROLE AND IMPORTANCE

The role of the Finance Department is important because it ensures that the business maintains a complete and accurate financial history of its performance. This financial information allows management to evaluate profitability, assess financial health, and make informed decisions. Without a proper finance function, a business may generate sales but still struggle with cash flow issues or hidden losses. Therefore, the Finance Department acts as a backbone that supports both daily operations and long-term sustainability.

MAIN ACTIVITIES

One of the main activities of the Finance Department is the preparation of financial reports. This involves converting daily transaction records into key financial statements such as the Statement of Profit or Loss and the Statement of Financial Position. These reports provide clear insights into the business's profitability, financial position, and overall performance. Financial reporting allows management to identify trends, monitor results, and evaluate whether business objectives are being achieved.

DAILY TASKS AND PROCESS

On a daily basis, the Finance Department records every financial transaction in a systematic manner. This includes sales, purchases, expenses, and payments. Each transaction is supported by proper documentation, creating a clear audit trail that enhances transparency and reduces the risk of errors or fraud. Daily cash closing and transaction recording help ensure that financial data remains accurate and up to date.

OPERATIONAL SUPPORT

Beyond recording and reporting, the Finance Department provides important operational support to the business. By analysing cost data, the department supports pricing decisions and helps ensure that selling prices are sufficient to cover costs and generate profit. Financial information is also used to support decisions related to cost control, resource allocation, and operational efficiency. Through this support, the Finance Department contributes directly to the smooth running of daily business activities.

FINANCE RESPONSIBILITY IN KEDAI RAMAH

Kedai Ramah does not have a formal finance department. Instead, all finance-related responsibilities are handled directly by one of the three business partners. These responsibilities include daily cash closing, recording financial transactions using Excel, monitoring costs, and managing profit distribution among partners every six months.

Although the financial system is relatively simple, Kedai Ramah applies key finance principles such as separating personal and business finances, maintaining basic financial records, and using cost data to support pricing decisions. This practical approach allows the business to maintain financial efficient, while remaining flexible and supporting its day-to-day operations and long-term sustainability.

CRITICAL SUCCESS FACTORS

1 CONSISTENT FINANCIAL RECORD KEEPING

One of the key success factors of Kedai Ramah is its consistent financial record keeping practice. The business records daily sales, cost of material purchases, operational costs, and calculate the daily profits. The use of Excel formulas and an internal database to calculate the cost of goods sold allows the owners to understand daily profitability. Also the usage of POS systems help them to record the customers payment and business transactions better. This will help information in the Excel system were accurate and tally with the POS systems.

In addition, Kedai Ramah has separated business accounts from personal accounts, which improves financial clarity and control. This practice helps ensure accurate monitoring of cash flow and supports better financial planning and decision-making. For a small business, consistent record keeping is essential to maintain financial stability and operational discipline. This factor is critical as it enables the owners to monitor daily performance, manage cash flow effectively, and business can continue operating sustainably.

2 GOODCOSTING MANAGEMENT

Kedai Ramah's cost management, which is an important success factor for small food businesses. The owners actively control food costs by limiting toppings and standardising menu portions. This helps reduce waste and maintain stable profit margins.

Labour costs are also managed flexibly. Employees are paid on a daily basis and workforce size is adjusted depending on daily demand, especially during rainy days when customer traffic is lower. In addition, the business limits ingredient storage to four days to avoid spoilage. This cost control practices allow Kedai Ramah to remain efficient and resilient despite demand uncertainty.

3 AFFORDABLE PRODUCT PRICING

Another important success factor is Kedai Ramah's affordable product pricing. The business offers products at a lower price compared to competitors while maintaining better quality. According to the interview, there are currently no competitors offering similar products at a lower price.

This pricing approach attracts customers and builds loyalty, while still allowing the business to cover costs and earn profits. By focusing on quality and affordability, Kedai Ramah strengthens its market position and ensures steady customer demand, which supports long- term financial sustainability.

g.Hence, the implementation of controlling cost
s and utilities. With good cost control on the
ate the excessive spending so the owner will
ystem will help them to reduce human error risk

WEAKNESSES

The weakness for Kedai Ramah were they are using contributions from owners.Pak Kadek and his friends using their personal savings to invest in the business. It will create slow growth due to limited internal funds, requiring them to wait until they get the specific amount or sufficient cash is available before investing in improving or in order to upgrade the operations. If the business has limited funds it will lead to misses many opportunities in expanding the oration and business. As mentioned by Pak Kadek, he wanted to expand the restaurant to make more customers come at one time, but due to limited capital they have to postpone it until they get the excess money to do it.

Other than that, they did not prepare financial statements for their business. It will create poor financial control due to the owner not being able to review their profit and loss clearly as there is no proper evidence to show the company's performance. As a result, they will face difficulty in decision making while they are just making assumptions instead of actual data.

SWOT ANALYSIS

OPPORTUNITIES

Thus, the opportunity for Kedai Ramah to expand the business by opening new branches. Although higher capital was needed in opening a new branch,the popularity of mee ramah has been increasing by days due t promotion from several influencers who came to the restaurant to taste the mee ramah. The business performance as the specialty of mee ramah has spread over the country. With the expansion of other branch in urban areas will enhance and give opportunity to other people to taste mee ramah. Kedai Ramah's expansion is expected to boost and improve corporate performance through increasing sales, a broader market reach, stronger brand awareness, and long-term profitability that provides adequate cash and good financial control.

THREATS

Lastly, the threat for Kedai Ramah is the disruption of cash flow due to the rainy season. As mentioned by Pak Kadek, when there is raining weather continuously for four days it might affect the sales as the customer has difficulties buying from them as they choose to stay at home. They have to all out promoting the mee ramah once the rainy season ends. However it will affect the profit because the revenue is reducing but the cost of promotion is increasing.

ISSUES

1 SUPPORTING DOCUMENTS ARE NOT STORED

Kedai Ramah records daily sales and expenses consistently at the end of each business day. The recording process is done manually during closing time, and the figures are entered into Excel to calculate daily and monthly performance. This shows that the business already has good discipline and awareness in managing financial records, which supports daily operations and performance monitoring.

However, supporting documents such as sales and purchase receipts are not stored for a long period after the data has been recorded. Once the figures are entered into Excel, the receipts are usually no longer kept for future reference. From a financial management perspective, these documents are important to allow transactions to be verified again if needed, such as when reviewing past expenses, checking sales accuracy, or evaluating business performance over time. While this does not affect daily operations, it may reduce the reliability of financial records in the long term.

2 SINGLE-PERSON FINANCIAL RECORDING

At Kedai Ramah, daily financial recording is usually handled by one person during the closing process. This person is responsible for recording total daily sales, including both cash and QR payments, as well as all daily expenses. This system is practical and commonly used in small UMKM businesses, especially those that operate based on trust and close working relationships.

However, when only one person records both income and expenses, the figures are not separated. This increases the risk of human error, such as miscalculations, missed expenses, or incorrect cash counts, particularly on busy days or when different staff members handle closing duties. This issue is not related to dishonesty, but rather the absence of a basic internal control that could help detect errors early and improve accuracy.

3 FINANCIAL RECORDS DO NOT FULLY FOLLOW ACCOUNTING PRINCIPLES

The Excel system used by Kedai Ramah is detailed and regularly updated, allowing the business to track sales, expenses, and profit on a daily and monthly basis. The records provide useful information for understanding operational performance and controlling costs. This shows that the business already has a strong foundation in financial recording.

However, the system mainly focuses on profit calculation using a single-entry approach and does not provide a clear summary of the overall financial position. Information such as remaining cash, accumulated savings, and amounts distributed to owners is not presented in one structured overview. As a result, although detailed data exists, it is less efficient for the owner to quickly assess the business's financial condition when making improvements, managing funds, or making future decisions.

RECOMMENDATIONS

1 KEEP RECEIPTS FOR REFERENCE

Kedai Ramah is recommended to keep sales and purchase receipts for a longer period after the figures are recorded in Excel. Currently, receipts are used only for daily recording and are not stored for future reference. While this does not affect daily operations, keeping receipts would allow past transactions to be reviewed or verified when needed, such as when checking expenses or reviewing business performance.

A simple method is to store daily receipts in an envelope or file organised by date or month, or to keep photos of receipts in a phone folder or cloud storage. These receipts do not need to be reviewed regularly, but they can serve as supporting evidence if the owner wants to check expenses, confirm figures, or explain past costs. This practice does not require changes to the current recording process or additional cost, but it strengthens financial records and makes future checking easier and more reliable.

SIMPLE ROLE SEPARATION WITH GUIDANCE 2

To reduce the risk of recording errors, Kedai Ramah can apply simple role separation during daily financial recording. At present, one person records both sales and expenses, which may increase the chance of human error, especially on busy days.

As an improvement, one person can record daily sales from the POS system, while another records expenses based on receipts. Before finalising the records, both figures can be briefly checked together. This process only requires short guidance, as the Excel format and POS system are already familiar to the team. It does not need new systems or extra cost, but helps improve accuracy, reliability, and basic internal control.

3 CREATE A FINANCIAL SUMMARY SHEET AND SLOWLY USE ACCOUNTING SYSTEM

To improve clarity of the overall financial position, Kedai Ramah can strengthen its current Excel system by creating one financial summary sheet. This sheet can combine key information such as cash balance, savings profit distribution, and remaining business funds, allowing the owner to quickly understand the business condition without reviewing multiple sheets.

In the longer term, Kedai Ramah may gradually consider using a simple accounting system designed for UMKM. Such systems automatically organise sales, expenses, cash balance, and owner distributions into a clear financial overview. The system does not need to replace Excel immediately and can be adopted step step. This approach help gives Kedai Ramah clearer financial view without disrupting current operations or increasing costs

CONCLUSION

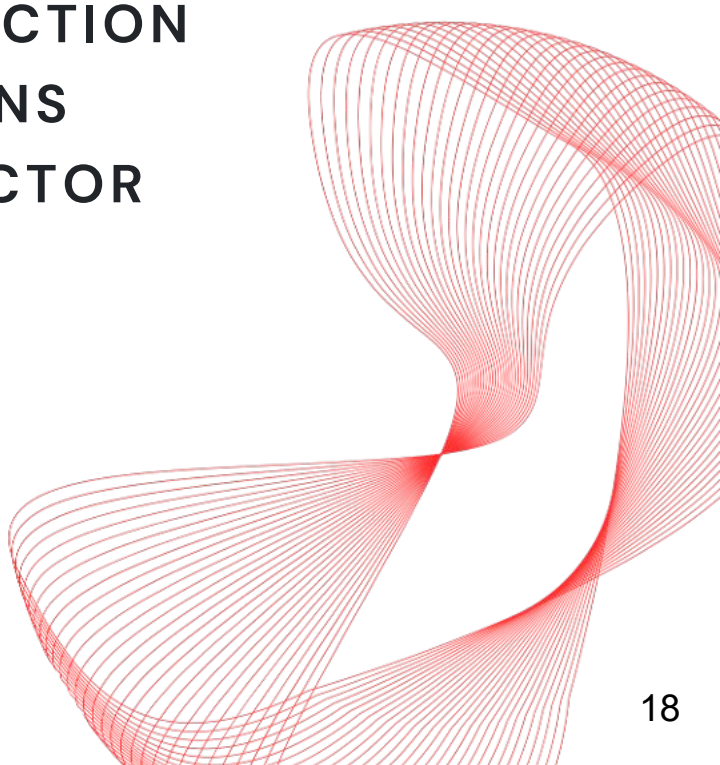

This SULAM study shows that Kedai Ramah already practices good basic financial management. The business consistently records daily sales and expenses using a POS system and Excel, controls costs through portion management, and separates business and personal finances. These practices help Kedai Ramah manage cash flow, monitor performance, and operate steadily.

Several areas can be improved, including keeping receipts for long-term reference, reducing reliance on one person for financial recording, and improving the overall financial position. The recommendations focus on strengthening the existing system and gradually adopting a simple accounting system over time.

This project helped us understand how practical accounting supports UMKM stability and decision-making.

PRODUCTION DEPARTMENT

- DEPARTMENT INTRODUCTION
- LAWS AND REGULATIONS
- CRITICAL SUCCESS FACTOR
- SWOT ANALYSIS
- ISSUES
- RECOMMENDATION
- CONCLUSION

INTRODUCTION

The productiondepartment of Kedai Ramah is primarily responsible for managing and carrying out daily activities in the kitchen. The department ensures that food production is done effectively, quality requirements. Food preparation, order processing, equipment operation and cleanliness control are among its primary responsibilities.

Food production department oversees such as noodles and dim sum based on daily customer demand. Specialised kitchen equipment, such as noodle boiling machine is utilized to increase efficiency and shorten service times particularly during peak hours. When equipment issues occur, manual cooking methods are used to assure continuous operations. In order to achieve food safety regulations, the department maintains cleanliness and hygiene through daily and weekly deep cleaning efforts.

The production department of Kedai Ramah is responsible for managing daily operations to ensure the business runs smoothly. It oversees food preparation, order processing, equipment operation, cleanliness and customer service to maintain quality and efficiency. The department also plays an important role in delivering service values, particularly friendliness, which is central to Kedai Ramah's business identity.

The making of Bakmie:

- Add garlic oil and chili oil into a bowl as the base of the dish
- Boil the noodles and bok choy together until fully cooked
- Place the cooked noodles and bok choy into the bowl and mix well with the oils
- Add toppings such as soy-braised chicken, fried dumpling skin, spring onions, and fried shallots
- Serve the dish hot for the best taste and dining experience

LAWS AND REGULATIONS

Law No. 18 of 2012 on Food (Undang-Undang Pangan)

The Act is the main legal framework governing food safety, quality, and distribution in Indonesia. It requires food businesses to provide safe, hygienic, and fit-for-consumption food. The routines at Kedai Ramah such as regular deep cleaning, proper storage, equipment cleaning, and informing customers about delays, show compliance with this law, especially in preventing hygiene contamination. These activities demonstrate adherence to national food safety standards.

Ministry of Health Regulation No. 1096/MENKES/PER/VI/2011 on Hygiene and Sanitation of Catering Services (Jasaboga)

This policy sets mandatory hygiene and sanitation standards for restaurants, covering kitchen practices, equipment sanitation, and food handlers. The owner of Kedai Ramah follows these standards through weekly deep cleaning, regular freezer maintenance, and proper closing procedures. These practices align with the regulation and help minimize contamination, ensuring a healthy environment for customers.

Government Regulation (PP) No. 86 of 2019 on Food Safety

This regulation provides detailed technical guidelines for implementing the Food Law, covering supervision, hygiene, and risk control in food preparation and service. Kedai Ramah follows these requirements by maintaining operational continuity, managing risks, and protecting consumers during disruptions. This demonstrates how the business applies regulatory standards in its operations.

Government Regulation No. 5 of 2021 on Risk-Based Business Licensing (OSS- RBA)

In Indonesia, all food and beverage businesses must register and obtain licenses, including a Business Identification Number (NIB), to ensure legal and risk-based operations. Kedai Ramah's operational decisions such as limiting delivery platforms, controlling business scale during peak periods, and managing inventory reflect structured governance and compliance with the OSS licensing requirements.

CRITICAL SUCCESS FACTOR 1

Reliable equipment and effective backup systems are essential to the operational success of Kedai Ramah. As a food service business that handles steady customer flow, especially during peak hours, the performance of kitchen equipment has a direct impact on speed, efficiency, and food quality.

Kedai Ramah relies on a four-burner noodle boiler that allows the preparation of multiple portions at the same time, helping the kitchen manage high demand efficiently. In addition, food heaters are used to keep dim sum warm and ready to serve immediately, which reduces preparation time and ensures consistent temperature and quality. Backup solutions also play an important role. When equipment malfunctions occur such as gas issues or machine breakdowns staff are able to switch to manual cooking methods like using pots and stovetops. This flexibility prevents the entire food preparation process from stopping, allowing the business to continue serving customers even under pressure.

Reliable equipment ensures that food can be prepared quickly and consistently, which enhances customer satisfaction and reduces waiting times. Backup systems help avoid delays and service disruption, protecting the business from losing customers during busy periods. Maintaining smooth operations also supports Kedai Ramah's reputation. When customers consistently receive fast and dependable service, they are more likely to return and recommend the shop to others. In turn, this contributes to customer loyalty, reduced complaints, and overall business sustainability.

CRITICAL SUCCESS FACTOR 2

Hygiene control and proper storage management are key factors that uphold Kedai Ramah's reputation as a safe and reliable food provider. In the food service environment, hygiene is not only a legal requirement but also a fundamental expectation from customers. Kedai Ramah recognises that cleanliness and proper handling of ingredients form the foundation of food quality, customer satisfaction, and operational integrity.

To maintain hygiene, the business carries out daily stock checks and weekly deep cleaning, particularly focusing on cold storage units such as freezers and chillers. Staff are trained to use gloves and maintain clean workstations during preparation to ensure minimal contamination risk. Ingredients are organised systematically based on type, shelf life, and usage needs, ensuring that expired or unsuitable raw materials are never used. By strictly following storage routines, the business reduces spoilage and keeps ingredients fresh and ready for use.

The impact on business success is significant. Strong hygiene standards give customers confidence that the food they consume is safe, which increases trust and encourages repeat purchases. Consistent cleanliness also reduces health risks and minimises food wastage, supporting cost efficiency. Over time, this CSF helps Kedai Ramah build long-term loyalty, maintain a positive reputation, and ensure sustainable operations even as customer expectations grow.

CRITICAL SUCCESS FACTOR 3

Efficiency in kitchen operations and resource control plays a critical role in ensuring Kedai Ramah can serve customers quickly and consistently. As demand fluctuates throughout the day, the business relies on structured workflows, organised workstations, and proper task allocation to handle customer flow smoothly. Efficiency becomes even more essential during peak hours, where delays can lead to dissatisfaction and lost sales.

Kedai Ramah supports efficiency by using appropriate equipment and ensuring work processes are clear and manageable. Regular cleaning and maintenance prevent interruptions caused by equipment breakdowns or cluttered preparation areas. Resource control is equally important in keeping accurate track of ingredient levels ensures that essential items are always available and reduces the chance of running out during busy periods. These practices help the team stay prepared for unexpected surges in demand.

When operations run efficiently, service speed improves, which enhances the customer experience and strengthens satisfaction. Faster service also allows the business to serve more customers within the same time frame, increasing revenue potential. At the same time, proper resource management minimises waste and supports cost control, enabling the business to remain profitable. Ultimately, efficiency and resource control contribute to business stability and help Kedai Ramah remain competitive in a highly dynamic food market.

SWOT ANALYSIS

STRENGTHS

Direct owner involvement enhances operational control and service reliability

Theowner'sdirect involvement in daily operations allows closemonitoring of production and service activities. This hands- on management approach enables the owner to identify operational issues early and make immediate decisions when problem occur, such as using manual methods when equipment fails. As a result, service continuity is maintained and customer dissatisfaction is reduced.

Efficient production flow supported by suitable equipment

Theuseofafour-burner noodle boilerand food heater improves production efficiency. These equipment allow multiple portions of food to be cooked or kept warm simultaneously, which reduces preparation time per order. During peak hours, this help stabilize workflow and prevents bottlenecks in the kitchen. Overall, the combination of appropriate equipment and efficient workflow enables the outlet to serve customers faster manage high demand and maintain consistent product quality.

WEAKNESSES

Dependence on manual processes for continuity

Although Kedai Ramah hasbackup options such as manual cooking when equipment fails, heavy reliance on manual processes reduces operational efficiency. Manual cooking requires more time and physical effort, particularly during peak hours. This can slow down service speed, increased staff workload and lead to fatigue, which may affect service consistency and overall production.

Reliance on early-morning sourcing of fresh ingredients

Kedai Ramah dependson dailyearly-morning purchasesof fresh ingredients, such as vegetables and onions, typically around 5:00 a.m. This creates dependency on staff availability and market supply conditions. Any disruption, such as staff absence, supplier issues or limited market supply, may affect ingredient availability and disrupt daily operations.

SWOT ANALYSIS

OPPORTUNITIES

Improvement of inventory and waste management

The daily replenishment of noodles and regular sorting of ingredients provide an opportunity for Kedai Ramah to introduce a more systematic inventory management approach. By implementing basic inventory tracking methods, such as recording daily stock usage and monitoring expiry dates, the outlet can better control ingredient consumption. This will help reduce food waste, prevent over-purchasing and lower operating costs.

Standardization of operational procedures

KedaiRamahhas theopportunitytostrengthen its operations by introducing formal standard operating procedures (SOPs) for key activities such as cleaning routines, equipment maintenance, food handling and inventory management. Clear SOPs can improve food safety compliance and ensure consistent operational practices regardless of staff on duty. Standardization also reduces dependence on individual experience or judgement, minimizing errors and inconsistencies.

THREATS

Operational disruption due to equipment failure

Equipment issues such as stove breakdowns or non-functioning machines, pose a significant threat to smooth daily operations, particularly during peak business hours. Although Kedai Ramah has backup options such as switching to manual cooking methods, repeated equipment failures can still reduce service efficiency. These disruptions may slow down food preparation, increase waiting time for customers and place additional physical and mental stress on staff. Over time, frequent operational disruptions can negatively affect service consistency, customer satisfaction and the outlet's overall operational performance.

Dependence on key suppliers for essential ingredients

KedaiRamahrelies heavilyon specific suppliers for essential ingredients including halal-certified chicken, fresh noodles and other core food items. This high level of dependency exposes the business to supply-related risks such as delivery delays, inconsistent ingredient quality or sudden prices increases. Any disruption in supply can affect daily production schedules and limit the outlet's ability to meet customer demand. If these issues persist, they may negatively impact product quality, pricing decisions and customer satisfaction.

CURRENT ISSUES

One of the current issues faced by Kedai Ramah is a high reliance on manual cooking methods during peak service hours. The kitchen still depends heavily on staff-operated processes, especially when equipment is unavailable, overloaded, or unable to keep up with demand. With only one noodle boiler in operation, the production capacity becomes limited when customer volume increases, particularly during lunch and dinner periods. As a result, food preparation slows down, causing longer waiting times for customers and reducing overall service speed. This situation also places physical and mental pressure on employees, who must work rapidly and repetitively to keep up with orders, increasing fatigue and the likelihood of mistakes. The issue not only risks customer dissatisfaction due to delays but also challenges management in ensuring consistent food quality and service performance during busy periods, highlighting the need for operational strengthening and equipment support.

Kedai Ramah also experiences issues related to limited staff competency in handling kitchen equipment. Most operations are overseen by the owner and partner, and many employees are not fully confident in operating essential tools independently. This causes reliance on experienced staff and slows down workflow when trained workers are unavailable. Incorrect or hesitant equipment handling may disrupt service or reduce efficiency, while employees may feel stressed when assigned unfamiliar tasks. The issue affects customers through inconsistent service speed and requires management to invest extra time in supervision and guidance, highlighting the need for broader staff training and skill development.

Another current issues faced by the production department at Kedai Ramah is the supply timing risk for fresh ingredients. The business relies on early morning sourcing of vegetables and onions from local markets, while noodles are purchased daily in limited quantities to maintain freshness. This makes daily kitchen operations highly dependent on timely and consistent supply. Any delay in delivery or shortage of ingredients can disrupt food preparation, especially during peak hours when demand is high. Limited stock may run out faster than expected, forcing staff to rush food preparation to meet customer orders, which increases the risk of errors and reduces overall efficiency. As a result, customers may experience menu item unavailability or longer waiting times, employees may feel stressed when managing shortages, and management faces potential sales loss, operational disruption, and customer dissatisfaction if such issues occur repeatedly.

RECOMMENDATION

Based on the problems identified above, several comprehensive recommendation have been made to improve the overall structure and functionality of the production department. Firstly, we recommend purchasing an additional noodle boiler or semi-automated equipment to ensure smooth kitchen operations. Staff should also be trained to use the new equipment safely and effectively to maintain food quality. For a small business like Kedai Ramah, the cost of the additional equipment is manageable and does not require major changes to the kitchen layout. The benefits include faster order preparation, reduced staff workload and lower risk of operational disruption. These improvements can help increase daily sales and offset the initial investment. By investing in additional or semi-automated equipment is a practical and cost effective solution that strengthens operations and supports the long term stability of Kedai Ramah.

Secondly, vital recommendation is implementing a structured cross-training program for all staff on kitchen equipment and key operations can help improve daily efficiency and reduce operational risks. This can be done through short in-house training sessions led by the owner, focusing on the correct use of each type of kitchen equipment, supported by simple operating guides to ensure consistent work practices. The program is suitable for a small business like Kedai Ramah as it involved minimal cost and does not require external trainers. Although there may be a temporary drop in productivity while staff are being trained and some employees may need more time to gain confidence, these issues can be managed through continuous supervision. In the long term, cross-training helps reduce errors, improved efficiency, minimize food waste and energy use and also ensures smoother operations even when staff are absent, supporting sustainable and stable business performance.

Finally, developing a reliable supplier schedule with buffer stock and simple inventory monitoring can help Kedai Ramah reduce the risk of ingredient shortages and operational disruptions. This can be implemented by identifying and building relationships with one or two backup suppliers for key ingredients, reducing dependence on a single source. In addition, using a simple daily inventory checklist to track stock levels will help anticipate shortages before peak hours. This approach is suitable for a small business as it requires minimal investment, involving only basic record keeping and a small buffer stock. However, backup suppliers still need to be monitored for quality and delivery timing and buffer stock must be managed carefully to avoid spoilage or increased storage needs. In long term, this strategy supports more stable operations, strengthens relationships with local suppliers and promotes sustainable, community-based sourcing.

CONCLUSION

In conclusion, the Production Department of Kedai Ramah plays a crucial role in ensuring smooth daily operations, consistent food quality, and efficient service delivery. Through effective food preparation processes, proper use of kitchen equipment, and strict hygiene practices, the department directly supports customer satisfaction and business sustainability. Although challenges such as reliance on manual operations, limited staff skill coverage, and supply timing risks exist, these issues can be addressed through practical recommendations such as equipment upgrades, staff cross-training, and improved supplier management. Overall, a well-managed production department serves as the operational backbone of Kedai Ramah, contributing significantly to its reputation, growth, and long-term success as an SME.

OPERATIONAL DEPARTMENT

- DEPARTMENT INTRODUCTION
- LAW, REGULATION AND AUTHORITIES
- CRITICAL SUCCESS FACTOR
- ISSUES
- RECOMMENDATIONS
- CONCLUSION

General Overview

The operations department of Kedai Ramah is not established formally, but the operational department of the organization is very essential in the daily running of business. The owner, together with the service staff, share operational duties, which encompass primarily those activities related to customer facing activities like taking orders, managing of the flow of services together with payments and ensuring that the dining area is clean. Such operational practices guarantee the day- to-day operations to operate effectively using minimal resources and having few team members.

The operations functioning aspect is directly related to customer satisfaction, sustainability of the business since it is required to deliver efficient services, specific transactions, and clean restaurants. Some of the daily operations undertaken are preparation of service area before opening, dealing with customer orders and occupying tables throughout the operating hours, receiving payment at the cashier desk and washing tables after usage. Though this is an informal management of tasks; such practices allow Kedai Ramah to ensure that the level of service has some consistency and sustain a steady sales performance day by day.

LAWS, REGULATIONS & AUTHORITIES

1.RELEVANT LAWS AND REGULATIONS

The law that governs food safety, food hygiene, and food quality standards is **Law No. 18 of 2012** on food. This regulation obligates food enterprises to make sure that food is safe to consume, it is handled in a hygienic manner and it is stored in a proper way that would not lead to any form of contamination. This law is followed to ensure the safety of the customers and safeguard the business against lawsuits. Next, Food safety requirements are also enhanced by **Government Regulation No. 86 of 2019 on Food Safety** which highlights the cleanliness of equipment, correct food handling methods and hygiene of employees. This regulation is in line with functional practices of Kedai Ramah like use of gloves, hairnets and correct kitchen cleaning practices. The operations department should make sure that they are always upheld in normal day operations towards regulatory standards.

.

2. EMPLOYMENT AND WORKPLACE REGULATIONS

T**he Law No. 13 of 2003 on Manpower** also requires that Kedai Ramah should meet the obligations regarding the working hours, salaries, safety at the workplace, and welfare of employees. Management of the operations department will need to address the daily staffing, assigning of tasks and working schedules, and the impact of this law will be vital. A non-conformity may lead to labor relations, fines, or a negative image. Also, **The law No. 1 on work safety of 1970** is applicable to the activities that are related to the use of kitchen equipment, tools that are used in food preparation, and cleaning. Provision of protective gear like aprons, gloves and attention to safety shoes is an indicator that the operations department has a role to play in ensuring the working place is safe and minimize accidents at the workplace.

LAWS, REGULATIONS & AUTHORITIES (CONT)

3. BUSINESS LICENSING AND LOCAL REGULATIONS

On the operational level, Kedai Ramah has to follow the business licensing and especially through the **Online Single Submission (OSS)** system in Indonesia, which grants Kedai Ramah **Business Identification Number (NIB)**. The licensing guarantees that the business is legal and should operate. In the case of Bali food businesses, it is also necessary to comply with **local government rules (Peraturan Daerah / Perda)**, in particular, those regarding hygiene, waste disposal and operating schedules. These local regulations directly influence the decisions made every day in terms of waste separation, cooperation with waste banks, and cleanliness levels inside the premises.

4. RELEVANT MINISTRIES AND AUTHORITIES

These laws and regulations are regulated by several government bodies. Food safety standards and hygiene requirements are covered by the **Ministry of Health (Kementerian Kesehatan)** whereas fair business practices and distribution are controlled by the **Ministry of Trade (Kementerian Perdagang)**. The **Ministry of Manpower (Kementerian Ketenagakerjaan)** controls the labor laws, rights of employees, and occupational safety standards, which play a vital role in operations management. On the local level, the **Bali Provincial Government and Denpasar City** governments oversee business compliance regarding sanitation and waste management and business permits.

CRITICAL SUCCESS FACTOR

1. Operational Effciency and Workflow

Critical success factor is operational efficiency, since daily operations which start at opening, and end with closing, are a key to the uniformity of the quality of services. The multi skilled employees who can multi-task can be used to reduce the waiting time of customers, there will be no delays on orders and the kitchen will not be a bottlenecks, particularly during the peak time. This has created the flexibility that means even with the small number of staff, the operation can go on efficiently leading to quicker services and better management of the workload and more customer satisfaction.

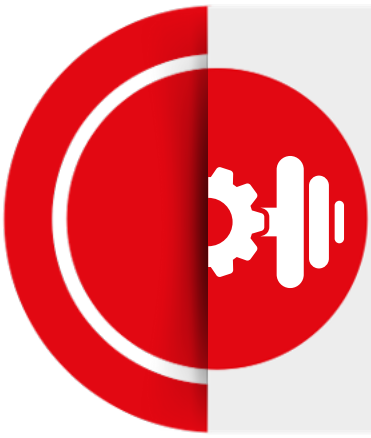

2.Effective System Usage (POS system)

Application of a POS system in order taking, payment and sales recording greatly enhances operational accuracy and speed. The computerized relay of the orders between the cashier and the kitchen results in a reduction of human error and reduction of processing time, hence, more fluid coordination between the front of house staff and the kitchen staff. Moreover, proper sales tracking helps to be financially controlled, have daily closing, day-to-day decision-making and more operational transparency and accountability.

3.Hygiene Control and Monitoring

The maintenance of food safety and service standards requires hygiene control and constant monitoring. Pre-opening cleaning, table cleaning after each customer, and constant cleanliness controls allow to consider adherence to the health regulations and avoid complaints connected with hygiene. Good hygiene practices save the business reputation, create customer confidence and trust, prompt repeat business, word of mouth, and minimize the chances of health problems or regulatory fines.

SWOT ANALYSIS

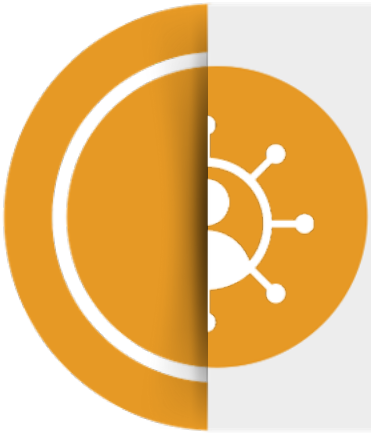

STRENGTHS

Kedai Ramah operates with a simple and efficient service process, where customers place their orders and make payments directly at the counter, reducing confusion and speeding up transactions. The use of a POS system supports service operations by accurately recording orders and payments, improving coordination and reducing service errors. In addition, staff are multi-skilled and able to multitask, allowing the business to maintain smooth service flow despite having a small operations team.

WEAKNESSES

Operational coordination at Kedai Ramah relies heavily on verbal instructions and staff experience, rather than a structured system, which may lead to confusion during busy periods. In addition, high workload during peak hours places pressure on staff as they handle multiple service tasks simultaneously, potentially slowing service speed and affecting consistency in customer experience.

OPPORTUNITIES

Kedai Ramah has the opportunity to benefit from growing customer demand driven by social media exposure, which can increase customer traffic and sales. Additionally, there is an opportunity to enhance the use of the POS system for better service control, such as managing order flow and identifying peak hours, to further improve operational efficiency and customer experience.

THREATS

Customer crowding during peak hours poses a threat to service efficiency and customer comfort, potentially leading to longer waiting times and dissatisfaction. In addition, competition from similar small food businesses offering fast and affordable food may attract customers if they provide smoother service or a more comfortable dining experience.

ISSUES

Issue 1: Peak-Hour ServicePressure

Peak-hour service pressure refers to periods when a large number ofcustomers arrive within a short time frame, creating high demand for service comparedto normal operating hours. For Kedai Ramah, which opens at 4:00 pm, peak hours typically occur between 6:00pm and 8:00pm, when customers come for dinner after work or study hours.

During these peak hours, the sudden increase in customer volume results in longer waiting times and slower table turnover, as staff must handle ordering, serving, and table clearing simultaneously. As a result, customers may feel frustrated and less satisfied with the service, service staff experience higher stress and heavier workloads, and the business reputation may be affected if customers perceive the service as slow or disorganised.

01

Issue 2: No Structured Customer Flow & Queue Management System

02

Thisissue occurs becausecustomersare required to queue at the cashier counter for both ordering and payment, while table availability and service flow depend largely on staff observation rather than a structured system. During peak hours, this leads to congestion at the counter, as customers gather in the same area.

As a result, customers may feel confused about where to stand or when they will be served, and staff may become overwhelmed when handling multiple customers at the same time. In terms of implications, service becomes slower during busy periods, the risk of customer dissatisfaction increases, and the business may create a negative impression of professionalism and operational efficiency.

Issue 3: Limited Seating and Service Area Layout

Thisissue arisesbecause Kedai Ramah operates inahome-based setting with a fixed table and counter arrangement, and there is no specifically designed layout for customer flow or waiting areas. As a result, customers may feel crowded during peak hours, while waiters have limited space to move when serving and clearing tables. When many customers arrive at the same time, this situation leads to slower service and reduced operational efficiency.

03

In terms of implications, customers experience reduced comfort and a less positive dining experience, staff face higher fatigue and a greater risk of minor accidents, and from the business perspective, potential reputational damage and lower customer retention may occur if customers associate the outlet with congestion and discomfort.

RECOMMENDATION

Implement a Digital Queue & Pre-Ordering System

Modernization can be achieved with minimalcapital expenditureby leveraging existing digital payment infrastructure in Indonesia, which oftenprovides QR-based ordering at little to no cost. This transition serves as a high-impact "quick win," reducing the administrative burden on the staff while preserving essential cash reserves.

In a home-based operational setting, this technology is vital for maintaining neighborhood harmony. By shifting the ordering process directly to the tables, counter congestion is eliminated. This keeps the surrounding "Gang" clear and quiet, respecting the personal space of neighbors and ensuring the business remains a considerate member of the community.

Adopting digital menus also aligns the business with sustainable, eco-friendly practices by significantly reducing paper waste from manual order notes. This shift not only supports environmental goals but also enhances internal organization, as the kitchen can manage incoming digital orders with greater precision and less physical clutter.

The implementation follows a streamlined three-step process: linking the menu to a custom QR code, installing professional QR stands at key touchpoints, and training the team to monitor orders for immediate preparation. To mitigate potential technical hurdles or customer confusion, the staff will provide active, on-floor guidance to ensure the transition is seamless and user-friendly.

Strategic Layout Restructuring & Feedback Loop

Small Changes, Zero Cost.

The best part about this plan is that they do notneed a bigbudget or aconstruction crew. It is simply about working smarter with what Kedai Ramah already have to rearranging their existing furniture to create a space that breathes better. It is a practical way to level up our professionalism without the stress of a massive bills.

Putting Our Team First. This is not just about moving tables; it’s about making the shop with a safer place to work. When the Kedai Ramah try to clear out those crowded "bottlenecks," they are looking out for their staff. It reduces the risk of accidental bumps or spills during a busy rush, showing the team that their safety is always our top priority.

To us, sustainability means being efficient with our resources. By perfecting their layout, they can serve more people and keep our sales steady without needing to use more energy or expand their physical footprint. They are proving that they can grow their impact while keeping our environmental "weight" exactly where it is.

Kedai Ramah should start by creating a simple "Flow Map", a clear one-way path for entering and existing so nobody is bumping into each other. To keep getting better, they also should launch a "Partner Coupon" system. If a customers leaves us a Google Review, they get a discount on services from our local friends, like AC cleaning, which keeps our feedback loop fresh and our community connected.

But, as they know that change can be a little confusing at first. During that first week, a customers or a waiter might head the wrong way. They should handle this with a smile, having the team ready to gently guide people through the new flow until it feels like the most natural thing in the world.

Implemation of segregation of duties and additional staff in the stall

This strategic plan optimizes operational efficiencyby leveraging existing talent through effective organizational changes. Implementing a part- time position specifically during peak hours offers a fiscally responsible solution to manage high-demand periods, ensuring that the core team remains supported and the shop's finances remain stable.

Furthermore, hiring local youth reinforces the company's commitment to community values and social responsibility while providing a mentorship platform for aspiring entrepreneurs. This targeted support effectively prevents staff burnout, safeguarding the "Ramah" service standard and ensuring a consistently positive.

Theproposedoperational structure maximizes efficiencyby assigning specialized roles to the core team. The Order Prep lead utilizes pre-portioned ingredients for rapid production, while the Runner maintainsthe "2-Minute Reset" standard for table cleanliness. The POS Lead manages financial transactions and gathers customers feedback, while the Floater (part-time hire) provides agile support across all stations as needed. This division of labor ensures high-speed service and consistent shop maintenance during peak periods.

To mitigate the risk of a new hire misaligning with the company's signature hospitality style, a visual training guide will be implemented as a standardized "cheat sheet." This tool ensures that the "Ramah" service standard is communicated clearly and executed consistently from the first day. By providing a simplified reference for quality and tone, the shop guarantees a uniform customers experience regardless of the staff member's tenure.

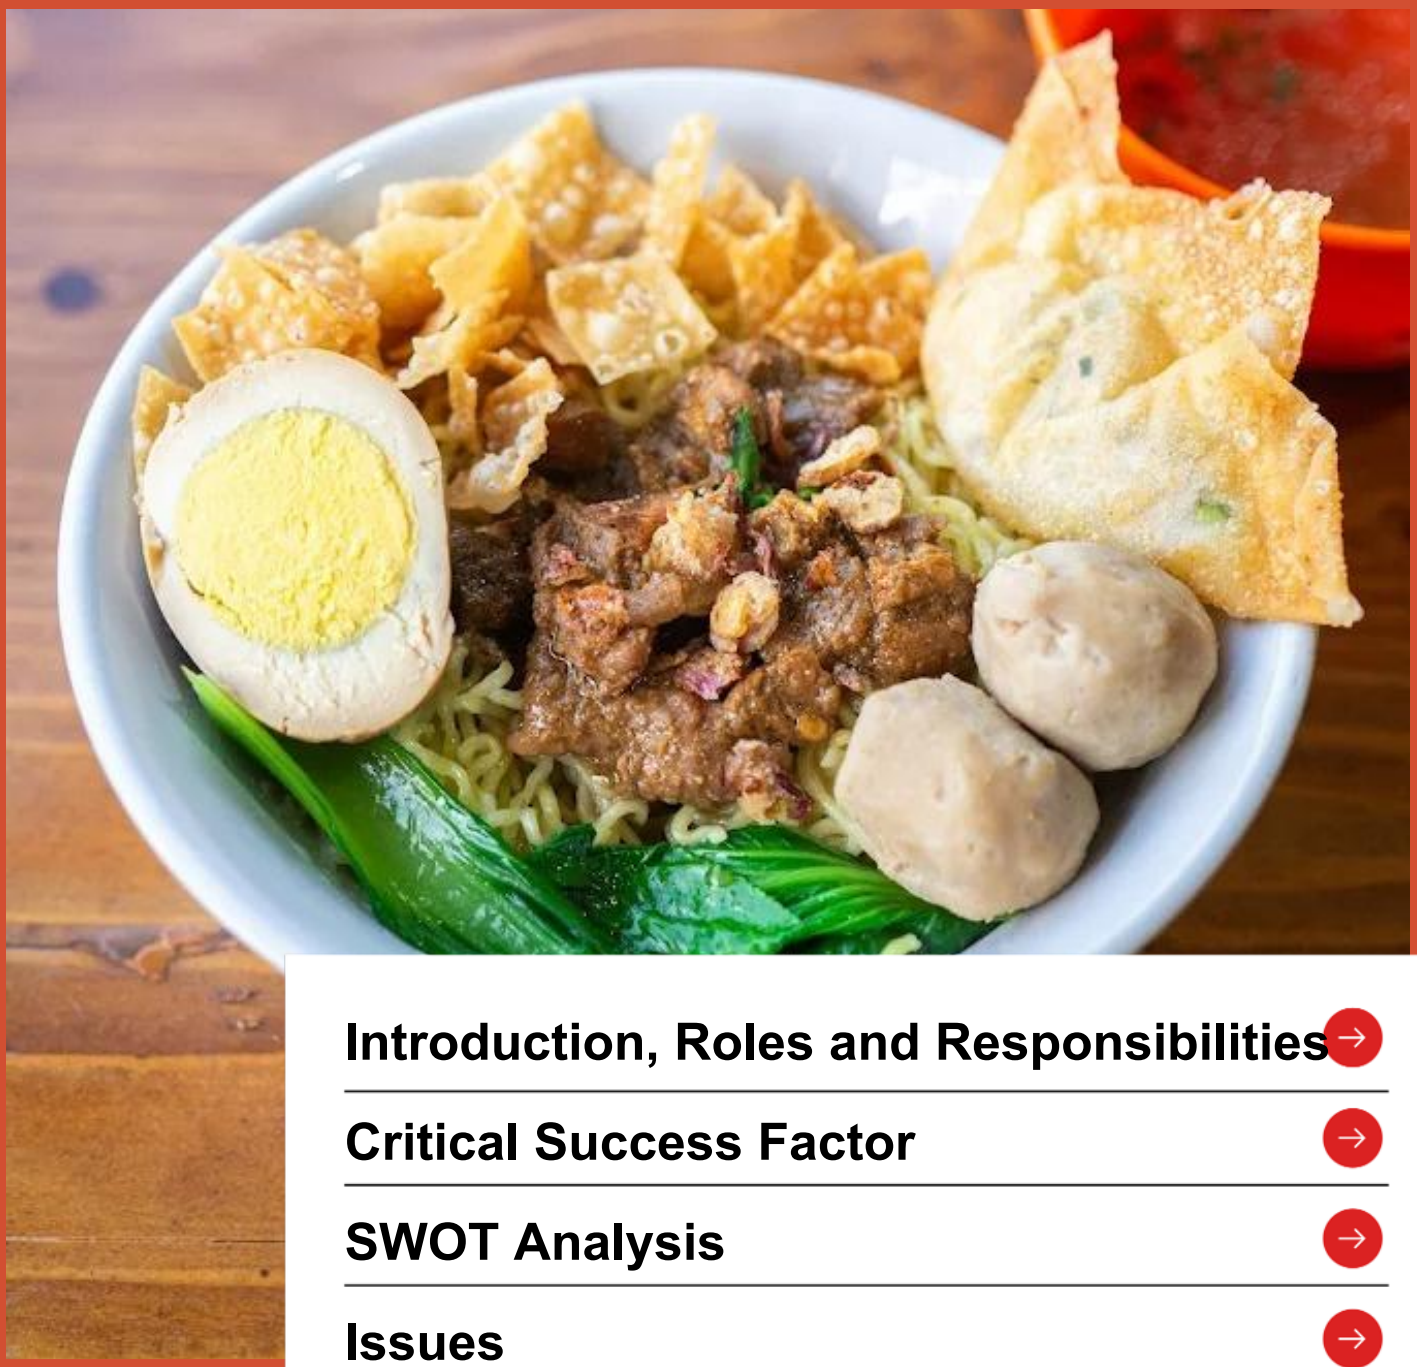

CONCLUSION

Ingeneral, this department is vital in increasingthevaluecontributioninthe organization. Although the existing manual workflow hasbeen helpful in theoperations,itrevealsweaknesses in efficiency and scale. Through the switching of the digitaland zonal servicemodel,aswellastheredesigning of the physical layout to make a specific flow of the takeaway one, the departmentisgoingtobeabletomake the service much faster and more satisfactory to customers.

Such enhancements will gain revenue by improving turnover, building a strong brand reputation, and scalability of operations. In this project, they get to know that the most effective way of achieving the best customer experience is to integrate a back-of-house and front-of-house process. It also points out that small and medium enterprises can be able to counter technological changes by adapting to them and working with other industry partners.

SALES & MARKETING DEPARTMENT

Introduction, Roles and Responsibilities

Critical Success Factor

SWOT Analysis

Issues

Recommendations

Conclusion

INTRODUCTION

SALES & MARKETING DEPARTMENT

- Kedai Ramah does not have a formal Sales and Marketing Department as the business operates on a small-scale basis. All sales and marketing activities are handled directly by the owner itself, which is Pak Kadek. This structure is common among SMEs due to limited human resources and operational constraints.

- Despite the absence of a dedicated department, sales and marketing play a vital role in ensuring the sustainability and growth of the business. The owner is responsible for promoting products, attracting customers, managing customer relationships, and generating revenue. Direct involvement allows for close customer interaction and quick decision-making, which are essential for small businesses operating in a competitive environment.

- Overall, although Kedai Ramah lacks a structured departmental setup, its sales and marketing function remains crucial in supporting business performance and maintaining strong relationships with customers.

ROLES AND RESPONSIBILITIES

Marketing Strategy

At Kedai Ramah, sales and marketing activities are primarily managed by the owner, with occasional assistance from staff in posting content on social media platforms such as Instagram and TikTok.
Offline marketing: relies on word-of-mouth promotion and banners displayed at the premises
Online marketing: focuses on social media engagement and direct communication through WhatsApp. Regular customers use WhatsApp to place orders and receive notifications when their meals are ready, enhancing convenience and customer satisfaction.

Sales Management

- Setting menu prices
- Managing daily sales transactions and
- Implementing promotional pricing strategies.

The owner designs affordable entry-level pricing to attract new customers while encouraging repeat purchases through portion upgrades and add-on options. Loyalty-based promotions are also managed directly to increase customer retention and purchasing frequency.

INTRODUCTION

Post Content/ Promote Product

Social media serves as the main promotional channel, with content typically posted up to three times per week. These posts focus on

- menu updates,
- special promotions and
- event announcements

Kedai Ramah has implemented several promotional strategies to attract and retain customers,

- special opening promotions
- limited-time discounts for dine-in customers and
- loyalty-based rewards.

Customers who collect a certain number of purchase notes are entitled to free menu items or special incentives, which encourage repeat visits and higher spending.

Managing Customer Relationship

The owner interacts directly with customers, ensures friendly service in line with the “ramah” brand concept, and encourages customers to provide feedback and online reviews. Communication through WhatsApp is managed to facilitate order placement, provide updates, and maintain relationships with regular customers, enhancing customer satisfaction and loyalty.

CRITICAL SUCCESS

FACTORS Effective Use of Social Media Platforms

One critical success factor for Sales and Marketing at Kedai Ramah is the effective use of social media platforms, particularly Instagram and TikTok, with Instagram as the main channel. These platforms are used to promote menu items, events and daily updates at a lower cost. Content such as influencer videos, event highlights and promotions help business reach young customers effectively. This factor is critical as social media act as the main communication tool with customers, increasing brand visibility, attracting new customers and encouraging repeated customers while maintaining cost efficiency suitable for an SME.

Customer-Driven and Influencer Supported Promotion

Another critical success factor is customer-driven promotion that supported by influencers and community involvement. Kedai Ramah benefits from word-of-mouth, customer reviews, influencer marketing and active sharing by young customers (students). Encouraging customers to leave reviews further strengthens this approach. This factor is critical because peer recommendations are highly trusted, enhancing credibility, expanding market reach and attracting new customers while keeping marketing costs low.

High Engagement and Value-Based Content Strategy

Lastly, another critical success factor is the ability to create high-engagement content that provides value to customers. Video content such as reviews from influencer and new updates from Kedai Ramah perform the best meanwhile photos are mainly used for promotions and announcement. Content is only posted when it is necessary to avoid audience fatigue. This factor is critical because engaging content helps maintain customer interest, strengthens brand image and converts online engagement into physical store visits, supporting long-term sales performance.

SWOT ANALYSIS

01 STRENGTH

Akey strength of Kedai Ramah lies in its low-cost pricing mechanism and cost-effective marketing that ensures its social cause and business sustainability. The budget-friendly menu items with optional upgrades allow the enterprise to attract a wide range of customers, including students and workers, hence creating incremental sales per visit. At the same time, the owner takes advantage of online communication channels like Instagram, TikTok, and Google Reviews, supported by the involvement of its staff, cooperation with influencers, and local events, to keep the level of publicity high and attain client loyalty with a minimum amount of investment. This combination of accessibility, flexible marketing, and community interaction adds brand recognition, creates motivation to continue business, and strengthens the status of Kedai Ramah as a company that values quality, affordability, and serviceability to the customer in a competitive SME environment

02 WEAKNESSES

Despiteits strengths, the Sales and Marketing team faces significant weaknesses due to the lack of organized marketing planning and overdependence on a small range of digital platforms. The distribution of content happens infrequently and reactive, as the main activity of content distribution takes place during promotional events or menu launches, thus undermining brand consistency and consumer loyalty. The reliance on individual influencers also presents the department to social media volatility and availability and undermines marketing stability. Additionally, using only WhatsApp as the only method to make order online limits the customer base, efficiency of operations, and availability of useful information to support marketing analytics and promotion. Compared to food delivery platforms, WhatsApp lacks automated ordering, promotional tools, customer discovery, and built-in payment services, which limit new clients and competitiveness in the online food delivery market.

SWOT ANALYSIS

03 OPPORTUNITIES

The Sales and Marketing team has significant opportunities to deepen the presence on market and customer engagement of Kedai Ramah with help of strategic partnerships and digital strategies. Collaborations with local businesses, educational institutions, and event organizers may expand the brand's reach and attract new customer groups. In addition, the introduction of content calendars system, integrating digital tools, and the use analytics can improve marketing performance and enable more targeted promotions. The rising popularity of home-cooked business also gives Kedai Ramah an opportunity to distinguish itself through the concept of rumah and community-based events. These opportunities, including collaborations, systematic online marketing, and alignment with new culinary trends, outline the routes to expand the market, strengthen the brand presence, and enhance the overall promotional efficiency.

04 THREATS

TheSales and Marketing team of Kedai Ramah is exposed to external threats that can impact its performance, market position, and overall business sustainability. The increasing competition in the local culinary market, where other businesses may undercut prices or adopt aggressive marketing strategies, poses a significant challenge. The changes in consumer preferences, changes in social media algorithms, or changes in the credibility of influencers can also impact the brand visibility and consumer acquisition. Moreover, the effect of the weather conditions like heavy rainfalls or reduced seasonal foot traffic may temporarily disrupt the efficiency of the promotional efforts and events and negatively affect the overall sales. These external threats such as the increased competition, change in consumer behavior, and environmental contingencies require proactive strategies to maintain sales, brand reputation, and the long-term sustainability and development of Kedai Ramah.

ISSUES

The Sales and Marketing team at Kedai Ramah faces several critical challenges that limit its ability to capitalize on opportunities in a competitive market. These issues can be broadly categorized into three major issues: limited marketing resources, inconsistent and reactive marketing activities, and the difficulty in adapting to changing market trends and increasing competition.

01 Limited Marketing Budget & Resources

Kedai Ramah is the limitation in marketing budget and human resources due to its small scale business, where operational costs are prioritized over investing in paid advertising or professional marketing services. Kedai Ramah relies heavily on low-cost platforms such as Instagram and TikTok, handled by the owner, with limited support from staff. While cost-effective, this approach restricts market reach and execute consistent, well-funded campaigns. For stakeholders, this situation increases their workload and operational pressure, while potential customers face reduced exposure to promotions and updates, which could slow down the restaurant's long-term brand visibility and growth potential.

02 Inconsistent Social Media Content and Engagement

Although the restaurant initially planned to post content three times per week, they post less often due to concerns about overwhelming the audience with repetitive promotional content. This irregular posting schedule negatively impacts in social media algorithms and limits interaction with the target audience, causing slows down the growth of followers and reduces interaction compared to competitors who post more consistently and creatively. For stakeholders, this inconsistency means that potential customers may miss out on important promotions or event updates, while the business risks losing its competitive edge in an increasingly digital and content-driven marketplace.

03 Increasing Competition and Market Saturation

KedaiRamah faces strong competition from a growing number of small culinary businesses, many of which are operating from residential locations that utilized low entry barriers to offer more visually appealing concepts, lower prices, or trend-driven menu items. This rapid imitation of successful business models creates pricing pressure and the ongoing need for innovation to differentiate itself to maintain customer loyalty. For stakeholders such as customers and business partners, the rise in competition may provide more options at lower prices, but for Kedai Ramah, it faces the risk of retaining brand loyalty unless the restaurant can effectively communicate its unique value proposition, such as its Tri Hita Karana concept and emphasis on customer-centric service.

RECOMMENDATIONS

To enhance the competitiveness of the Sales and Marketing at Kedai Ramah, several practical and realistic recommendations are proposed. These recommendations are designed to be feasible for a small and medium enterprise (SME), while remaining ethically sound, socially responsible, and sustainable in the long

01 Allocating a modest and controlled marketing budget

Kedai Ramah should consider for paid digital advertising on platforms such as Instagram, TikTok, and Facebook as it will help to attract a larger customer base and new customers unfamiliar with the services offered by Kedai Ramah. While current marketing efforts rely heavily on organic content because it is cost- effective, which limits the exposure to potential customers. By investing a small percentage of profits to paid advertisements, the sales and marketing management can improve brand visibility without financial strain. For the customer, this ensures they are aware of promotions, new menu items, and the experiences of dining out in accordance to the tastes and their location. Ethically, paid advertisements prioritize inclusivity and fair representation where it sends the message to the customer of Kedai Ramah is a comfortable place to be in. Furthermore, a strategy of periodic rather than continuous advertising preventing customers to feel that they
arenotoverloaded with intrusive marketing.

02 Establish a structured and consistent content schedule

Kedai Ramah should establish a structured and consistent content schedule to improve communication with customers. By doing regular updates on social media will be a sure way for customers to get information about the restaurant like opening hours, menu, offers and special events. The existing reactive posting strategy can lead to customers receiving no significant updates and decreasing the engagement. Introducing a content calendar would enable regular posting, helping to maintain customer engagement, reinforce brand awareness, and reduce fluctuations in customer attention. This recommendation is highly feasible for an SME as it requires minimal financial investment and can be managed internally by existing staff. The consistency creates trust and reliability, which provide the customers with an even stronger attachment to the brand story. Additionally, it is very realistic and sustainable to the employees and does not cause burnout but makes the information shared with the customers as accurate, entertaining, and community oriented.

03 Monitor Competitors and Respond Strategically

Kedai Ramah should also follow the local competition, particularly home-based culinary businesses in order to be sensitive to the expectations of the customers on a weekly basis. By monitoring the competitors on pricing, menus, promotion plans, and the use of social media through online channels or physical and also food delivery apps, Kedai Ramah can make sure that their offerings remains relevant, affordable, and customer- focused. Based on that, Kedai Ramah is able to react fast in response to declining sales, or customer traffic with specific promotions, limited-time menu, value meal packages or service enhancements that highlight Tri Hita Karana values and unique experience of dining. On the part of the customer, this adaptability allows Kedai Ramah to keep the prices fair, the values of competition and the menu suited, thereby sustaining brand loyalty in a crowded local market.

CONCLUSION

To sum up, the sales and marketing management of Kedai Ramah is an important factor that has been keeping the business operational by its affordable pricing strategy, low-cost digital marketing and good network with local partners. The flaws of uneven posting of content and using only one platform which is WhatsApp as online order delivery, however, limit the capacity of the management to sustain a consistent sales performance. Kedai Ramah can enhance consistency, decrease the volatility of the revenues, and enhance customer engagement by introducing content scheduling, alerting the competitor, and allocating part of their money in digital marketing tools too. These enhancements will bring much value to Kedai Ramah in maintaining or increasing the revenue, building strong brand presence, and making sure that customer relationships would keep on increasing despite declines in physical visits. The group has also known through this project that effective sales and marketing team demands creativity, but also strategic planning, digital adaptation and sustainability thinking to enable the long-term success of a small and medium-sized enterprise (SMEs).

HUMAN RESOURCES DEPARTMENT

- Introduction andRolesandResponsibilities
- Key Success Factors
- SWOT
- Key Issues Faced by HR Department
- Recommendations
- Conclusion

INTRODUCTION AND ROLES AND RESPONSIBILITIES

As a small and medium enterprise (SME), Kedai Ramah does not have a formal Human Resource (HR) unit.

Instead, HR responsibilities are handled directly by the owner with his partner. Currently, Kedai Ramah employs 11 employees,makingahands-onapproachtohumanresourcemanagementappropriateforthesizeofthe business.

The role of the HR Department is to ensure that Kedai Ramah has a sufficient number of suitable and capable employees to support daily business operations. Employees play a crucial role in food preparation, service delivery, and customer interaction. Therefore, effective HR management is essential to maintain productivity and service quality. The HR Department also contributes to business sustainability by promoting a positive working environment, managing employee welfare, and ensuring workplace safety.

The principal functions undertaken by the HR Department are the recruitment and selection of personnel, on-the-job training, tracking the presence of staff members, and observation of employee welfare and motivation, as well as adherence to staff safety procedures. The recruitment of staff members is primarily carried out through personal interview and signboard ads. Newly employed staff members undergo training regarding work procedures and SOPs, which take an estimated three to four days to complete, administered by the owner or highly competent staff members.

Regarding their duties and functions, the HR Department manages employee attendance, flexible scheduling, and ensures that employees notify management of their inability to work. The department is also involved in managing all forms of employee communication, workplace incidents, and issues related to employee health. Sick employees are advised to stay back at home to avoid food poisoning and disruptions of operations.

In general, the role of the HR Department is significant to the business operation of Kedai Ramah, where it ensures that the employees are trained, disciplined, and motivated. This method of human resource management ensures that services are consistently delivered at a high quality, and employee turnover is minimized, allowing the business owner to focus on expanding his business, along with the concept of Kedai Ramah.

CRITICAL SUCCESS FACTOR

1. STAFF ATTITUDE AND SKILLS

Employee attitude and skills are a key success factor to Kedai Ramah because of the nature of the F&B industry, where employees have direct contact with customers and food preparation. Instead of hiring a very experienced employee, a highly experienced worker is not a priority but recruiting a proactive, adaptable, service-oriented employee is prioritized. The majority of employees are new graduates and part-time workers who are flexible and receptive to learning.

Kedai Ramah currently has 11 employees but the division of jobs is not clearly divided. The owner indicated that business can run smoothly with at least 8 employees on a daily basis, and when the demand is low as in the case of a low season, manpower can also be limited to a minimum of 3 workers. This flexible staffing method requires workers to work across the board and in response to the various roles.

Positive-attitude employees with minimum skills are used to decrease operational problems like slow service, ineffective interaction with customers, and health hazards. Through this, regularity in service delivery is achieved; hence, this boosts customer retention and favorable marketing ratings on the internet. These deliverables are a direct release to greater sales and business.

2. SIMPLE AND EFFECTIVE HR SYSTEMS

The other vital CSF in Kedai Ramah is that of using simple but effective HR systems. The company has explicit Standard Operating Procedures (SOPs) that it uses to direct the day-to-day operations, food preparation, hygiene standards and customer service practices. These SOPs are exchanged by means of on-the-job training by the experienced staff and the owner, which should allow the new employees to settle fast into their positions.

Three main people carry out the operations of the business. Pak Kadek is in charge of sales, marketing and HR, one partner is in charge of finance and the other in charge of operations and information technology. Nevertheless, the owner often performs several functions, such as operational and HR, which is characteristic of the small-scale business.

CCTV systems help to monitor and improve accountability to ensure that daily activities are monitored to prevent abuses like stealing, inability to comply with SOPs, or unbecoming workplace behaviour. With these systems, there is consistency in the quality of food and hygiene and the delivery of service and less operational mistakes, wastage of food as well as internal wrangles. Consequently, the management can pay more attention to the development of the business and subsequent expansion.

CRITICAL SUCCESS FACTOR

3.

EMPLOYEE MOTIVATION AND FAMILY-ORIENTED WORK CULTURE

Another important success factor at Kedai Ramah is employee motivation with the support of family-oriented work culture. The values promoted in the business include respect, trust and open communication between the management and the employees. The employees are also encouraged to approach the owner directly on matters affecting work and issues can be solved in an informal way and at the same time in a timely manner.

The workers are paid on a daily wage basis, and do not get an annual and paid medical leave, which resembles the part-time employment. However, both financial and non-financial rewards are used to encourage employees like bonuses, birthday meals, festivity recognition, and other welfare benefits like basic needs are provided occasionally.

This is a favorable working environment that increases employees' commitment, minimizes staff turnover, and promotes uniform quality of services. A consistent and committed workforce is also in line with the long-term goal of Kedai Ramah expansion of the business with existing workforce possibly running the outlets in future.

STRENGTHS

Kedai Ramah has good internal HR strengths that facilitate employee performance and quality of service delivery. The work culture of being family-oriented and respectful indicates high rates of relational management where the workforce is also treated like precious members of the family rather than being regarded as a labour tool that can be substituted. This fosters psychological safety, trust and open communication, which are important elements in employee engagement and collaboration, which is an HR aspect. The SOP based training system also improves work efficiency by standardising work processes and increases the time that new employees take to learn is also decreased. This enables the employees to gain role clarity fast thereby enhancing productivity and minimizing mistakes. Flexible staffing and time scheduling also enhance HR effectiveness through its ability to match the supply of its workforce with the demand in the customer market as well as facilitating work-life balance. There are also non-financial rewards like welfare support and festive contributions that are considered to be also important motivational factors since they meet the social and emotional needs of the employees which contributes to long-term commitment.

WEAKNESSES

In spite of these strengths, Kedai Ramah has a number of HR weaknesses that could inhibit sustainability. Informal recruitment process is not properly screened and competencies determined and there is high probability of poor person-job fit. This may lead to lack of motivation, poor performance and increased disciplinary problems in the perspective of HR management. There are no formal HR policies such as performance appraisal systems, annual leaves, medical benefits among others, which restricts fairness and consistency when handling employees. It becomes hard to identify the high performers or systematically deal with the underperformers. Moreover, laxity in attendance and time-punctuality will lead to a lack of role clarity and affect efficiency of operation during busy times. The high reliance on owners in making HR decisions is also a sign of lack of delegation in HR which adds more weight to the manager and limits professionalism in the organisation as business expands.

KEDAI RAMAH : SWOT ANALYSIS

OPPORTUNITIES

Kedai Ramah has important possibilities to enhance the HR performance and facilitate further development. Expansion plans of the business open up talents development opportunities, succession planning and leadership training. Retention can be enhanced by providing the best employees with supervisory or managerial positions to retain them and maintain organisational culture. The supply of young and fresh graduate employees also has the long-term workforce benefit since such employees are usually flexible and open to training. Academically, this helps in the development of human capital because skills that are developed are in tandem with the company values. Moreover, the currently available POS systems and CCTV offer a platform on which HR digitalisation can be based. They can be extended to monitor attendance, productivity and performance and make HR decision-making based on data, as well as enhance accountability and transparency.

THREATS

Nevertheless, Kedai Ramah is vulnerable to a number of external threats related to HR. The close competition in the food and beverage sector has led to the high likelihood of losing trained employees to other companies that provide higher salaries or other employment perks. Poor job security, including daily wage compensation, and unpaid medical leave could cause organisational commitment and voluntary turnover. The high turnover increases the costs of recruitment and training as well as disturbs the quality of services. Moreover, with the growth of the business, informal HR practices might become ineffective. In the absence of standardised HR systems, Kedai Ramah might experience challenges in ensuring similarity in service standards, employee discipline and organisational culture in the various outlets.

Comprehensively, the SWOT analysis shows that Kedai Ramah has good HR roots in terms of good work culture, good training practices, and welfare of the employees. Nonetheless, the recruitment, formal HR policies, and discipline control weaknesses are potential threats to the long-term performance. This implies that academically it may be necessary to get away with informal HR practices to a more formal HR system. With a competitive talent development and HR digitalisation opportunities coupled with mitigation of the job security and scalability issues, Kedai Ramah can improve its employee retention, operational performance, and organisational sustainability in a competitive industry.

ISSUES

1

Based on the analysis of Human Resources practices at Kedai Ramah, several critical issues have been identified that may affect the business's long-term sustainability and operational effectiveness if not properly addressed. One of the key challenges faced by the HR department is the high risk of employee turnover, which is largely driven by informal recruitment methods, physically demanding job requirements, long working hours, and relatively limited wages and benefits compared to larger food and beverage establishments. This situation often results in frequent staff replacement, increased training costs, and operational disruptions, while inexperienced employees may negatively impact service speed, food quality, and customer satisfaction.

2

The lack of formal HR policies and structured management systems is another weakness at Kedai Ramah. Currently, there are no written guidelines for attendance, leave, discipline, or performance evaluation, and most HR decisions are made directly by the owner based on daily situations. Although this informal approach provides flexibility for a small business, it can cause confusion among employees about their roles, responsibilities, and work expectations. Without clear rules and performance standards, employees may be unsure about acceptable behaviour and job performance, which can lead to misunderstandings, inconsistent treatment, and feelings of unfairness. Over time, this situation may lower employee morale, reduce accountability, and affect teamwork and productivity. From the management side, the absence of clear HR policies makes it difficult to manage employees consistently, evaluate performance fairly, and handle discipline issues properly, which may increase employee dissatisfaction and staff turnover.

3

Workplace conflict and employee relations are also important issues at Kedai Ramah, mainly caused by miscommunication, differences in background among workers, feelings of unfair treatment, and high work pressure during busy hours. The fast-paced nature of the food and beverage business, combined with heavy workloads and tight schedules, often increases employee stress and makes conflicts more likely to occur. When these issues are not addressed early, they can lead to ongoing disagreements, poor teamwork, higher absenteeism, and low employee morale. Employees may feel stressed, unhappy, and mentally tired, while the owner has to spend more time handling conflicts instead of focusing on improving and growing the business. If employee relations problems continue, service quality may decline, resulting in longer waiting times and unsatisfactory customer experiences, which can negatively affect Kedai Ramah's reputation and competitiveness.

RECOMMENDATIONS

First, Kedai Ramah should formalise basic HR policies and Standard Operating Procedures (SOPs) to create a more organised and consistent working environment. Simple written guidelines should be developed to cover key areas such as attendance, leave, discipline, and performance expectations. In addition, practical SOPs and checklists for daily operations—such as opening and closing procedures, cleanliness, cash handling, and customer service standards—should be prepared to ensure consistency in daily activities. These policies do not need to be complex, but they must be clear and easy to understand. Management should communicate them effectively through short briefings or informal meetings, allowing employees to ask questions and clarify expectations. This approach will help improve employee compliance, operational efficiency, and overall service quality at Kedai Ramah.

Second, the business should improve its recruitment and retention strategies by adopting a more structured yet flexible recruitment process that suits a small SME like Kedai Ramah. This includes preparing simple job descriptions that clearly explain job roles, working hours, and expected attitudes, which helps reduce misunderstandings and attract suitable employees. The recruitment process can remain informal but should focus on key qualities such as responsibility, willingness to learn, and ability to handle work pressure. To improve retention, Kedai Ramah can introduce small incentives such as attendance rewards, employee recognition, or “Employee of the Month” programs to make employees feel appreciated. These efforts can increase motivation, loyalty, and job satisfaction while reducing staff turnover and supporting smoother daily operations.

Third, fostering open communication and maintaining a positive, family-oriented workplace culture should remain a priority at Kedai Ramah, as it helps build trust between employees and management. Open communication allows employees to express concerns and share ideas without fear, enabling issues to be addressed early before they turn into serious conflicts. A respectful and supportive work environment also encourages employee loyalty and commitment to the business. Regular short meetings can be used to clarify work expectations, discuss daily operational issues, and improve teamwork. This approach helps reduce misunderstandings, improve morale, and support smoother operations, which ultimately leads to better service quality and customer satisfaction.

CONCLUSION

In conclusion, although the HR function at Kedai Ramah is managed informally, it plays a significant role in supporting the overall performance and sustainability of the business. The three identified Critical Success Factors which are staff attitude and skills, simple and effective HR systems, and employee motivation supported by a family- oriented culture are well aligned with the operational needs of an SME.

Effective HR practices contribute to smooth daily operations, consistent service quality, and cost efficiency. These outcomes enhance customer satisfaction, strengthen the business reputation, and support long-term growth. Overall, the HR function adds substantial value to Kedai Ramah by supporting employee performance, operational stability, and future business development.

JEMPUTAN UNTUK MENYERTAI PROJEK SULAM BAGI KURSUS MAF671 KAJIAN KES BERSEPADU FAKULTI PERAKAUNAN

Pihak Fakulti Perakaunan, Universiti Teknologi MARA (UiTM) Cawangan Melaka, berbesar hati untuk menjemput tuan/puan menyertai projek **Service Learning Malaysia University for Society (SULAM)** bagi kursus MAF671 Kajian Kes Bersepadu.

2. Projek SULAM merupakan inisiatif Kementerian Pendidikan Malaysia (KPM) yang bertujuan memberi pengalaman pembelajaran dengan menghubungkaitkan teori dan praktis dengan mendedahkan pelajar kepada penyelesaian permasalahan sebenar dalam komuniti.

3. Pihak tuan/puan diharapkan meluangkan masa dan memberi kerjasama untuk ditemuramah oleh pelajar bagi tujuan pengumpulan data projek SULAM ini. Penganalisaan data yang dikumpul dapat membantu pelajar mengenalpasti kekuatan, kelemahan, peluang dan cabaran serta isu-isu yang dihadapi oleh perniagaan tuan/puan. Seterusnya mereka akan memberi cadangan tatacara untuk mengatasi isu-isu tersebut. Pihak tuan/puan juga diharap dapat menilai laporan akhir yang disediakan oleh pelajar mengikut rubrik yang disediakan oleh universiti. Diharap cadangan- cadangan yang dimasukkan dalam laporan akhir ini akan membantu menambahbaik prestasi perniagaan tuan/puan.

4. Untuk makluman pihak tuan/puan, segala informasi yang dikumpul melalui projek SULAM ini hanya akan digunakan untuk tujuan pembelajaran dan tidak akan didedahkan kepada pihak lain tanpa kebenaran dari pihak tuan/puan.

5. Sekiranya terdapat sebarang pertanyaan, **Puan Amilia Binti Saidin** selaku penasihat pelajar bagi projek ini boleh dihubungi di **0132226481** atau **amilia580@uitm.edu.my.** Segala jasa baik tuan/puan kami dahului dengan ucapan terima kasih.

Sekian.
